

1. Define the general terms A, B, and C in your own words, in whatever way makes sense to you right now.

2. Can you see an relationship between the pairs of ideas (arrows AB, AC, and BC)? How does/could one influence the other? (Think about each pair and any practical examples that seem to apply).

3. What happens in the intersection of all three core concepts (D)? Can you think of any of your personal life experiences, situations, or environments where the three may have interacted somehow?
